Features

1. Innovative Boating Aid System - Rudder Position Indicator (RuPI)
2. Indicator of rudder positions - 0 to 50 degree revolutions
3. Long lasting luxury metal plating & transparent coating surface
4. Luxury interior decoration style - 48 crystals included in design
5. Indicating needle - 24K Gold plating
6. Fits on most motor boats and small yachts (universal application)
7. Simple Installation - No wires and holes need (sticker attach type)
8. Easy to adjust for the indicator's reference point
9. No power source necessary - gravity powered
10. Luminescent display disk for dark operation (optional)

Benefits

1. Know where the rudder is directed prior to driving
2. Real time indicator of sailing directions
3. Semi-permanent use
4. Luxury jewelry interior decoration
5. High quality and cost effectiveness
6. Can be used as a company promotion item or souvenir
7. The RuPI can also be used for passenger & SUV vehicles

Installation Guide

1. Lines up the steering wheel to be a neutral condition and the rudder to be a straight.
2. Takes off the vinyl of a self-adhesive sticker, and it attaches to the center of a steering wheel.
 * Recommended to safely put 3M sticker over the flame of portable gas lighter for 2~3 seconds to make a stronger adhesion.
3. Try to turn it with a right or left in order to come the RuPI's needle to the reference line.
4. Turn the steering wheel with a right and left, and confirm whether the directions of RuPI's would be the same with the directions of the actual rudder.

One year warranty on our RuPI.

Warranty does not cover : 1) Mis-use 2) Re-Assembly 3) Out of order due to Force Measure
 There will be no A/S for damage by dismantling or rebuilding the product.
